

SPECIFICATION AMENDMENT(S)

At page 1, after the title, insert the following cross-reference to related applications section:

CROSS-REFERENCE TO RELATED APPLICATIONS

This is a continuation-in-part application of International Application No. PCT/FI02/00234 filed March 21, 2002, which is hereby incorporated by reference in its entirety; and which claims priority to Finnish Patent Application No. 20010601 filed March 23, 2001.

At page 8, please add the following abstract section:

ABSTRACT

The invention relates to a method for measuring tissue edema. By a method in accordance with the invention an electromagnetic probe (24) is placed on the skin, and the capacitance of the probe is proportional to the dielectric constant of the skin and subcutaneous fat, which is proportional to the water content of the skin. The edema is scored by measuring the capacitance of the electromagnetic probe, so called open-ended coaxial cable, at a high frequency, approximately 20-500 MHz.
